NIS2 Directive

Article 28: Database of domain name registration data

1. For the purpose of contributing to the security, stability and resilience of the DNS, Member States shall require TLD name registries and entities providing domain name registration services to collect and maintain accurate and complete domain name registration data in a dedicated database with due diligence in accordance with Union data protection law as regards data which are personal data.

2. For the purposes of paragraph 1, Member States shall require the database of domain name registration data to contain the necessary information to identify and contact the holders of the domain names and the points of contact administering the domain names under the TLDs. Such information shall include:

- (a) the domain name;
- (b) the date of registration;
- (c) the registrant's name, contact email address and telephone number;
- (d) the contact email address and telephone number of the point of contact administering the domain name in the event that they are different from those of the registrant.
